

What are Magic Maths Meetings?

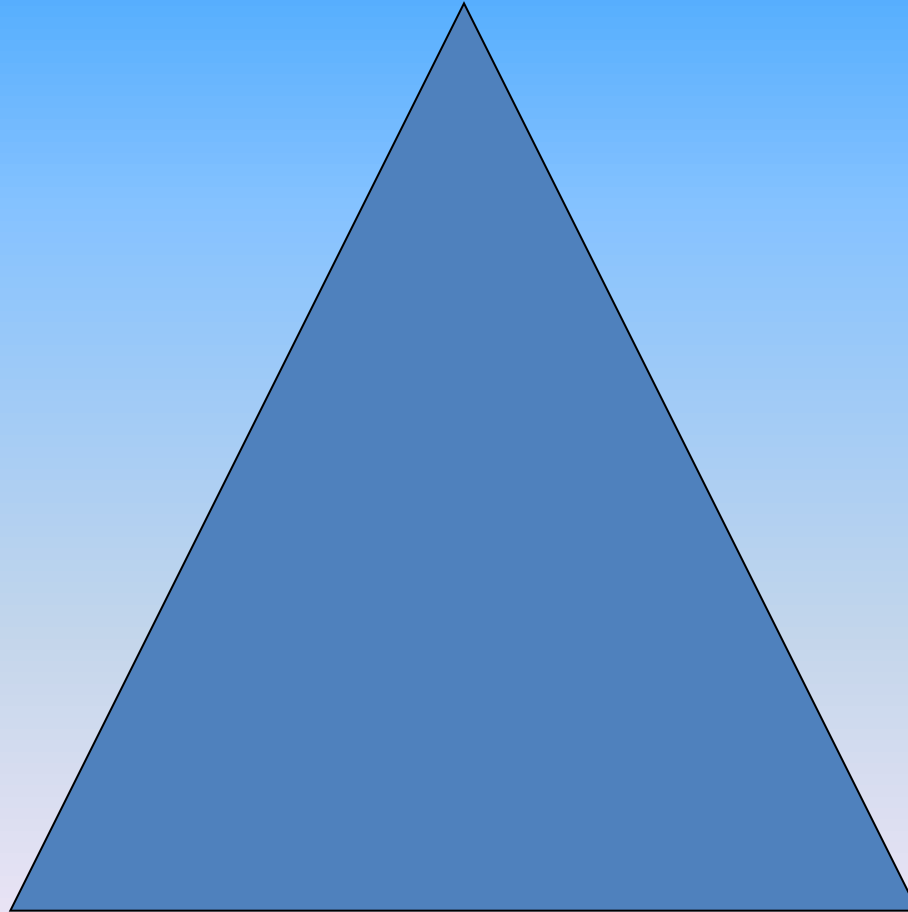

Magic Maths Meetings are designed to improve children's fluency, flexibility and confidence in mathematics.

Taking place everyday in class for approximately 15 minutes, Magic Maths Meetings feature thought provoking questions and challenges that are designed to promote lively conversation about mathematics. Children have the opportunity to talk about their ideas with a partner or group before feeding back to the class.

Teachers use these sessions to reinforce key mathematical concepts, rehearse fundamental skills and to excite children by presenting mathematics in diverse ways.
