31st January 2017

Dear Parents/Carers

We are going to be constructing Greek water clocks (Klepshydra), as our Design Technology project in Year 3. For this, we will be needing plastic bottles as the main material for the product. Each clock requires 2 of these bottles – ideally these should match or be of the same size. We are appealing for these to be sent into school as we need to start getting our collection of materials together, ready for next half term.

These plastic bottles do not have to be from sugar filled, soda type drinks – water filled bottles will be great, but they do have to be clear.

If the labels could be removed and the bottles washed out and dried – so much the better.

Many thanks for your continuing support.

The Year 3 team
