

Extended Learning Opportunities

Mythical Creatures

Below are some websites and activities that will help your child extend their learning within our topic this term.

Outside school learning

This half term we will be learning about Mythical Creatures such as dragons. You could visit Horsham Park and try to find the dragon in the middle of the maze. Why not take a photo to prove you found the dragon and bring it in to show to the rest of the class? There are plenty of activities you could do at home such as making models of mythical beasts out of recycled boxes and other materials. If you go for a walk in the woods, make a dragon or another mythical beast out of natural objects that you can find. There are hundreds of children's books about dragons, why not visit the library and borrow one? You could write a book review about it giving reasons why you would/would not recommend your chosen book to a friend.
